

Grid-Tie/Sellback, Automatic Standby Power or Remote Primary Power

# BPS 4448M & 3648M

## Power Management Solution

Locking Enclosure

Integrated Sub Panel

## System Features & Benefits

Locking Metal UL Rated Enclosure	Secure & Confined	Safety
Built-In Breaker Panel	Simplified & Economic Install	Easy
Pure Sine Output	Clean, Steady Power Output	Reliable
3.6-4.4kW of 120 & 240V Power	Versatile power for critical loads	Ready
8 High Capacity AGM Batteries	Maintenance Free	Quiet
Integrates & Expands Easily	Grows with your needs	Smarter
Quiet, Maintenance Free, No Fumes or Fuel		

Escape the pain and cost of power outages in a business or home. During a power outage the BpS Power Management System provides instant, clean and reliable power.

### How it works:

- Monitors the utility power 24 hours a day, 7 days a week, 365 days a year in your Business or Home.
- During a power outage,, designated critical circuits are seamlessly & automatically supplied with utility grade power.
- After power is restored the system will automatically transfer power needs back to utility power and resume charging the batteries to be ready for the next blackout.

Provides Hours of standby time (actual time depends on actual AC power Load consumption)

- > Quiet Indoor Operation
- > Renewable Energy Options to create your own power or extend backup time. Solar PV & Wind Turbine options available. Does not require fuel on hand, no start up transfer time, fuel, or dangerous or smelly fumes.
- > Integrates with portable or most auto start gen-
